TUFSTEEL® GALVANIZED STEEL FRAMING
INSTALLATION INSTRUCTIONS

Do not install this product unless you read and understand the Warnings and Installation Instructions contained in this manual. Failure to do so could result in serious injury or death.
Kelley ARMORGUARD HEAD PAD® dock seals are custom built for each application. Installation procedures are the same for all ARMORGUARD HEAD PAD dock seals regardless of size. Installation requires two people and a forklift truck or similar device to lift and position the pads.

⚠️ WARNING

Improper installation of anchoring devices or installation into aged or unsound concrete or other faulty or inadequate building wall construction could result in serious injury or death, as well as premature product wear, product failure, or property damage. Inadequate lifting equipment or unsafe practices can cause a load to fall unexpectedly. Make sure lifting devices are in good condition and have a rated capacity of at least 500 lbs. at the lifting angle that they are being used. Never allow anyone to stand on or near the dock seal component when it is lifted or placed. Failure to follow this warning can allow the dock seal to fall, tip or swing into people causing serious injury or death. Safety standards as described in this installation manual must be followed at all times. If you have any questions contact your supervisor or your local Kelley distributor for assistance.

Assembly of components should be performed in such a way so as to maintain cleanliness of equipment before final installation. Lifting equipment to be determined by installer (man lift and forklift or boom lift are typical). Wear safety glasses, gloves, hard hats, safety shoes and all necessary protective clothing.

### SUGGESTED MOUNTING METHODS:

1) **CONCRETE, BRICK, & PRECAST:** Use 1/2" or 3/8" x 3" expansion anchors on side pad brackets. Use through-bolt fastening if anchors will not hold, 3/8" threaded rod is recommended.

2) **METAL SKIN BUILDING:** Through-bolt fastening required. Use steel or wood back-up plate to support bolts, or anchor through existing building horizontal & vertical structural members.
