- Low profile, 9" (229 mm) carriage improves service range to 9"-25" (229-635 mm) off grade
- Durable zinc-plated, dichromate carriage stores off the drive for extensive all-weather use
- Standard LED internal/external communication system improves safety
- Patented IP65-rated gear motor never needs adjustment
- Watertight electrical connectors
- Zerk grease fittings on roller shafts
- Compact 12" x 12" control panel with plug-in modular wire board

**Dock Impact Barrier™**

The APS Resource Dock Impact Barrier is a manually operated barrier gate. When dock use is required, the Dock Impact Barrier is opened by releasing the foot latch and lifting the gate into an upright position with very little effort. Available in 8', 9' and 10' (2.4, 2.7 and 3 m) sizes.

- Reduces the occurrence of accidents due to forklifts, pallet jacks or pedestrians falling off the dock when the door is open
- Reduces the occurrence of damage to equipment, load, door panels and door track when the door is closed
- 9/16" (14.3 mm) - heavy-duty steel aircraft cable encased in flexible fiberglass rail withstands the impact of a 10,000 lb (4,536 kg) fork truck moving at 4 mph (6.4 kph)
- High visibility nylon netting and yellow 42" (1,067 mm) upper fiberglass rail provide additional personnel safety and meet the International Building Code
- Heavy-duty side members provide added protection
- Simple installation, minimal maintenance and easy operation
- Latch mechanism securely locks rail in place
- Raise and lower Dock Impact Barrier with one hand
